

Mary (Molly) Caroline Verrier Dip P&OT, MHSc
Associate Professor Emeritus, Department of Physical Therapy
Faculty of Medicine, University of Toronto (U of T)

Molly Verrier trained at U of T as an occupational and physical therapist. Her graduate studies at McMaster University were in Health Science and Clinical Neurophysiology giving her a broad background in health care delivery and neurological care. She is currently an Associate Professor Emeritus in the Department of Physical Therapy and the Rehabilitation Sciences Institute, the Institute of Medical Science, and the Department of Physiology in the Faculty of Medicine at U of T. She is an Adjunct Senior Scientist at the Toronto Rehabilitation Institute - University Health Network. She chaired the Ontario Ministry of Health and Long Term Care, Career Scientist Awards Panel (2004-2010) and was a member of the Spinal Cord Injury Quality of Life Committee of the Ontario Neurotrauma Foundation. Her research in health human resources applied to rehabilitation services delivery and in the discovery of best rehabilitative practices for neurological populations particularly, spinal cord injury and stroke, is translational in nature. As an academic leader in the rehabilitation sciences she has significant insight into the added value of rehabilitation in promoting and maintaining the health status, function, and well-being and an intricate knowledge of rehabilitation hospitals from the academic, service delivery and economic perspective. She currently is a member of the Board of Directors of the West Park Healthcare Centre in Toronto.
